CATALOGUE 2011

WE LOVE  
TO SKATE

**C**urrently I am trying to get back in shape so I skate quite frequently again, enjoying my new XXX<sup>2</sup> skates.

Today I went out for an early morning skate, blading to sunrise. While you skate alone, all on your own, you start to think about the past, present and future.

Reflecting on how my life has been so far, from professional speed-skater to businessman - is this what I always dreamed of?

YES - my job is my dream - as it is my life, as skating was and is my life. Growing skating and my company was and will always be my dream. A dream I sacrifice so much for - time, effort, family, friendship - all for your dream. BUT I would do it again any day, I am proud to say that I love to skate, and that at Powerslide WE LOVE TO SKATE.

Our 2011 collection makes me really proud. It reflects who we are, it shows that we think about the skaters first and that we are living and breathing skating. Innovative, stylish, controversial and above all high quality. It transports our passion and love for the sport, and it invites you to become part of the WE LOVE TO SKATE movement.

See you at any cool skate event near you.

**Matthias Knoll**  
"we love to skate" manager

## PHUZION Alpha Shell \_

UNMATCHED LOOK AND DESIGN

## PHUZION Alpha KIDS Shell \_

## SCC = SHELL CONNECTED CONSTRUCTION \_

The Phuzion Open Air proved it well, shell connected constructions work better in terms of performance and power transfer. Now we are using this technology on more models, Phuzion 7 and Phuzion 6 men and women.

## CUSTOM CUFF \_

Powerslide offers the first and only adjustable cuff on the market. Slim legs or stronger muscular legs, lower calf or higher calf muscles. Different anatomical shapes often cause pressure points. Not anymore! The Phuzion skates featuring the revolutionary Powerslide Custom Cuff adapt to all legs. You simply adjust the width of the cuff by yourself. The stretchable soft padding of the boot will adapt to the new shape and guarantees a snug and precise fit. Simple and effective for the perfect performance fit.

**HRS**  
HEEL RETENTION SYSTEM

## NEW PS BUCKLE \_

The new buckle is really clean and stylish, available in plastic and aluminium with different strap lengths and customized for every Powerslide skate.

## HABS \_

Adjust the width of your heel for a custom fit. Works perfectly together with the new padding with extra heel lock and the custom cuff function. Moreover the HRS improves stability.

Find your perfect braking point, adjust height while wearing down the pad.

## X-TECH Shell\_

## NEW ONE PIECE TONGUE\_

Powerslide developed a simple but effective one-piece tongue, no pressure points, perfectly shaped to the foot and the last. Thin and soft edges, in dual density foam and with built-in flex cuts for the perfect fit and flex. Another piece to the puzzle to perfection.

## NEW 3D PADDING\_

## PHUZION INNERSOLE\_

PS innersole with ventilation and a thinner toe part to give some more room in the toe area. Made out of high density EVA foam, toe antislip function and a recess for better grip, provides a perfect anatomical fit and shape. Pre-shaped and lasted to fit our Biolast II. The heel cushion includes a shockabsorbing gel and the perfect arch support provides the foot with the lateral support it needs.

## NEW HINGE SCREW\_

## POWERLACING\_

## FRAMES 2011

### 3X110MM X-FRAME\_

The Open Air proved to be a winner and the 3-wheel frame was not only an eye catcher but in skating it showed its real performance and power. Super fast, yet easy to manoeuvre and still quite low, the next level of performance fitness skates.

Now we made this 3x110 frame with the new X-frame extrusion.

### 4X100MM X-FRAME\_

For skaters who like it fast and hot.

This frame is stylish, light and low profile. The frame, allowing for max. 4x100mm, gives you a perfect ride and still a short wheelbase.

In delivery this frame will come with 90mm wheels, so when you feel ready, you can exchange for 100mm wheels - evolution drives customisation.

### VISION CASTED\_

As the Vision proved itself as the state of the art frame, we made it out of casted material, light and strong. This frame was engineered with strength and low weight in mind, simply great in its design and function. Fitted for the HABS. The Vision frame can be casted in different material compounds, in Magnesium and Aluminium mixture.

### VISION ALUMINIUM EMBOSS 4X76MM\_

For our new kids skates, we created a new mould, fitting up to 76mm wheels; low, light, stiff and cool looking, featuring 8mm axels.

This new frame makes the Phuzion kids skates even more unique, high performance and low weight.

ENJOY BEING A KID!

FUN - ADVENTURE - SPEED

## THE LAST\_

## THE MOUNTING\_

## SPEEDFOAM\_

Speedfoam is another advanced material used in our racing shoes. This foam is soft, but not too soft to absorb energy yet very comfortable. Step in and feel well from the very first minute you wear the boot.

## PORON\_

Poron Urethanes were originally designed for medical purposes where custom foam cushioning and comfort is most important. We chose a slow recovery urethane for our racing shoes – a unique custom contouring material. This material rebounds slowly when compressed, which results in a custom fit or contour during each use. The material will continue to return to its original shape when not in use. Features of Poron urethans are:

- \_ shock absorbing to protect against impacts
- \_ breathable to keep feet dry and cool
- \_ maintains cushioning for maximum performance
- \_ lightweight and flexible for continuous comfort

**PORON – PERFORMANCE FOR THE LIFE OF YOUR SHOES!**

## SHELLS

### SMART SHELL™\_

Ribs and raised up parts give stability and stiffness, we all know this from the Triple X boot featuring the X-Torsion Bar, which has the stiffest sole of all skating boots.

With the Smart Shell we took it one step further. Now we reinforced not only the bottom of the shell, but also the side / cuff area. New 3-D foams provide a new shape, based on the X-torsion bar, give stability to the bottom, but also make the ankle area stiffer for an improved power transfer.

### X-TORSION BAR SYSTEM™\_

The "X" is known as a very strong construction that you can find everywhere in nature, in modern architecture and in engineering. Our X-Torsion Bar, including the built in Clima Control System through our unique Skeleton C Concept, is still the leading shell construction.

### HOLLOW TUBE TECHNOLOGY™\_

The fundamental value of hollow constructions is weight reduction and added stiffness. Hollow tubes positioned between the two mounting blocks of the carbon shell are embedded in a carbonfiber matrix. The structured surface of the bottom adds extra strength to the overall shell construction and enables us to reduce the layup of the carbonfiber matrix. The result is a lighter yet stiffer shell construction.

## MATERIALS

### 12K CARBONFIBER\_

12000 fibers are bundled in one row, this means 4 times more compared to 3K carbonfiber that is usually used in speed shells. The shell construction is stronger and has a unique look.

### DESIGN FIBERGLASS\_

You want to be different? You want something special? Than this is the thing for you! Our new design fiberglass is an absolute eyecatcher. A unique look, never seen before.

### BASALT FIBER\_

As a basic material, basalt is a black, alkaline extrusive rock. With only 5% higher density than the conventional glass fiber, basalt fiber offers in comparison a 15% higher tensile strength, higher compressive strength and rigidity. Basalt fibers are 100% natural and inert, e.g. they are classified as non-poisonous and non-carcinogenic = 100% greenline.

### MICROFIBER NANOMATERIAL\_

Nanomaterial is the highest grade of microfiber materials. It is resistant yet light weight and flexible. Perfect for our boot uppers.

### WATERDROP SUPRAFIBER MATERIAL (WDS)\_

This is an all new very special and sensitive Microfiber that we use for the lining of our boots. The fibers are extra long to give more comfort and due to their hollow design they are also able to transport moisture away from the skin. WDS is very soft to the skin with excellent and luxurious draping qualities.

But what makes the real difference to conventional microfibers are the hollow dimples. They contain hollow fibers that create air circulation, providing an extra cooling effect. That means less heat/sweat inside the shoe and more comfort. Furthermore it results in better blood circulation and less fatigue of the foot for an overall improvement of your performance.

**NO. 1**  
RACE WHEELS

**JOEY MANTIA**

**CECILIA BAENA**

**YANN GUYADER**

**DEFCON**  
T R A C K W H E E L

**DEFCON** magenta is the new color of reference on tracks and roads throughout the world. Already now 300m road and track World records were set on Defcon wheels. No wonder the fastest men of the planet choose magenta when they need pure speed:

**JOEY MANTIA, ANDRES MUNOZ and KALON DOBBIN.**

But also on the long distances the Defcon wheels are all over the place. **YANN GUYADER, SCOTT ARLIDGE and FABIO FRANCOLINI** as well as **SABINE BERG** and **CECILIA BAENA**. All use Defcon in the vast majority of their races. Not only on the track, but also on road. The World marathon championships and multiple stages of the World Inline Cup were won on Defcon.

**LUBRICANT\_** Synthetic oil  
**SPECIALS\_** 100% rustproof

► **ALU SPACER 608** **900420 6,0mm**  
8-pack  
**900422 8,0mm**  
10-pack

► **SPEED OIL****900507**

7ml high speed lubricant;  
Made by Shell™

► **GREASE INJECTION****900510**

50ml high tech grease with Teflon by Du Pont™

► **SUPER LUBE TEFLON GEL****900508**

12g high tech gel with  
Teflon by Du Pont™

► **CITRUS CLEANER****900506**

250ml biodegradable cleaner  
on citrus/water base

► **GREASE SPRAY****900511**

250ml high tech grease

► **TURBO WASH****900505**

cleaning container for bearings incl. citrus cleaner

► **CARE SET****900512**

contains 250ml citrus cleaner;  
7ml oil; y-tool;  
two pins & brush

► **POWERSLIDE TOOL****907006**

small and compact multi-tool with anatomical handle and  
bearing extractor; exchangeable tip with 4mm hex and torx T25 head

► **SPEED ROAD  
HOG BRAKE**

**900555**

fitting max. 110mm wheel frames

**900021**

**Replacement Rubber Pad**

allround brake for almost all frames with flat side walls (Powerslide, Core, K2, Fila, RB, hockey skates, etc.)  
New axle system; replaceable rubber pad

► **ANKLE  
STABILIZER**

**900027**

S|M (up to size 42)  
L|XL (size 43 and larger)

power heel strap with micro adjustable buckle;  
incl. 2 different lengths of straps

► **AXLE KIT**

**904040 M7**

10 allround speed axles with T25 torx system;  
incl. Powerslide tool; fits almost all speed frames

► **MOUNTING KIT 904045**

4x M6 big head assembly screws with washers;  
T25 torx system

► **WAXED  
LACES**

**900024** black  
**904195** white

length: 150cm; flat

► **REPLACEMENT  
BUCKLE**

**900025**

ratchet buckle incl. 11 cm strap  
and mounting screw

► **PITCH  
CONTROL**

**900642** along  
**900643** across

lean more forward for fast action or lean more  
backward for long distance

► **STRIDE  
CONTROL**

**900637** along  
**900638** across

for the perfect angle between the frame and the  
boot for a perfect and longer push

► **BOOTCOVER**

**904105**  
37-50 EU  
5-15,5 US

stretchable Jersey material; water resistant;  
wind resistant; double sizes

Size: 200 x 130 cm

Material: storm flag

► **POWERSLIDE BANNER** 900560  
Size: 4 x 4 cm

durable and waterproof material, 4 side walls,  
easy extendable frame with click function,  
height adjustable, cover included

► **POWERSLIDE BANNER** 200534  
Size: 500 x 80 cm  
Material: storm flag

► **POWERSLIDE RUBBER BRACELET** 900590

► **SWEAT BAND** 900581

Terry cloth with elastane

2010 was a successful year for the Conference despite a slow market. Highlights included the dramatic merge of Deshi and USD and the successful implementation of Carbon in aggressive inline. The merge allowed for reinforced focus for the remaining brands, and the Carbons proved to be a revolution in skating. 2011 will be no different as we continue to focus on new projects and technologies, while making further efforts to strengthen the brands and teams.

## USD

USD is getting its own webpage once more and is ready to drop another series of bombs including the brand new Imperial and the Carbon II complimenting the re-launch of the VII skate with a new frame and soulplate. We will also see the comeback of USD liners and the Throne Jr. skate with an adjustable liner.

## Xsjado

The Xsjado team is highly motivated and unified with more direction than ever before. JC has joined the crew and has taken the driving seat, coordinating the team and promotion as well as working on the graphic designs and direction of the brand. Thanks to a substantial group effort the Xsjado II is underway, a skate which will also fit the current Xsjado model making it possible to customize both skates together and create great alternative options. Xsjado will also offer a wide selection of pro shoes and spare parts to bring Xsjado customisation a good few steps forward.

The Evolution 2010 includes new clothing, a new backpack and a new webpage.

## Kizer

Kizer is undergoing a complete overhaul with brand new image and direction. The tried and tested extensive frame selection continues strong as ever, with yet another exciting addition!

We are pleased to announce that materials and prices have been improved and adjusted, making team models cheaper while focusing on the longest lasting and fastest materials for our pro-frames.

## UC

Undercover is bringing hot new designs with improved compounds and the first ever 'wet wheel' for aggressive skating. UC takes pride in having the best wheels in the industry will continue to pioneer wheel technology as far as it can go.

## slacklines USA

**SLACKLINING** is a balance sport which utilizes nylon webbing stretched tight between two anchor points. Slacklining is distinct from tightrope walking in that the line is not held rigidly taut; it is instead dynamic, stretching and bouncing like a long and narrow trampoline. The line's tension can be adjusted to suit the user and different types of dynamic webbing can be used to achieve a variety of feats. The line itself is flat, due to the nature of webbing, thus keeping the slacker's footing from rolling as would be the case with an ordinary rope. The dynamic nature of the line allows for impressive tricks and stunts.

4 20cm tree protectors  
Bag, Instruction booklet  
Weight: 640g  
Dimensions: 200x170x28 mm

**RAPID:** this is a very universal set. With the powerful longlever ratchet, you can reach the maximum tension. This is excellent for beginners, but also for creating perfect jumplines. Longlines up to 30m are easy to build. With the quicklock system™ the fixation of the line is extremely fast and also the slings are very easy to remove again. The loose adapter system™ guarantees, that you are able to adapt new slacklines or any other slacklines to the system.
