# Rethinking Play

Welcome to Hape. This is our 27th year in business. We've come a long way from our beginnings as an educational toy supplier to kindergartens in Germany. While our imaginative wooden toys have remained true to their classic roots, we continuously rethink nearly every other aspect surrounding them. Reduce, reuse, and recycle are not just words at Hape. They are a mantra. Responsibility is reflected in an assessment of the environmental impact at each stage of our toys' lifecycle: from the materials we use, to the way products get to your store, to the packaging a child opens up. Because we manufacture products for children, how every product affects the world we live in is a high priority.

“Play is neither limited, nor defined, by culture, language, or gender.”

Our toys are designed to have a long life, which is why many of them are passed down from generation to generation. But rethinking ways to tweak traditional play patterns is where innovation kicks in.

Since producing one of the first full lines of bamboo toys in 2005, we've continued to explore the possibilities of this amazingly flexible resource. We now maintain our own bamboo forest, and sponsor bamboo workshops for international designers. Several of the newest bamboo toys in our collection are the result of those workshops.

Finally, when we think *and rethink* play, we strive to create toys with a global sensibility. All Hape toys *bamboo and wood, classic and new* are designed to be intuitive. Play is neither limited, nor defined, by culture, language, or gender. Every Hape toy encourages children to have fun, no matter who they are or where they live.

These are the ideas that drive our company. We hope you'll think *and rethink* about them as you play with our 2013 collection.

Sincerely,

**Peter Handstein**  
Founder

Hape believes that the future *begins & belongs* to our children. It is our duty to leave them with infinite possibilities, not unsolvable problems.

Our toys are created to inspire play, learning, and exploration of the world we live in; through responsible business practices we aspire to leave the world in a better condition than when we received it.

**RETHINK.  
REDUCE.  
REUSE.  
RECYCLE.**

Because we produce products for children,  
we need to be *aware* of how making those  
products *affects* their world.

## Materials

Hape was the first company to introduce a full range of bamboo toys. Bamboo is an environmentally friendly material that offers new possibilities for sustainable toy production.

## Production

Hape has strategically considered surface treatment, energy consumption, and packaging options to minimize environmental impact and maximize efficiency.

## By-products & Waste

Hape has introduced key processes to ensure that the variety of by-products produced cause minimal impact to the environment. A water purification system utilizes limited or no chemicals to release the cleansed water back into circulation.

## Shipping & Transportation

Hape buys materials from 10 countries and sells to over 50. Locating the Hape factory only 3km from the Ningbo-Zhoushan Harbor, one of the largest ports in the world, created transportation as well as ecological advantages.

# Like parents, bamboo is both a provider and a protector.

Bamboo is one of the fastest growing plants in the world. If cultivated properly, it can fully regenerate within 3 months causing no detriment to the surrounding ecosystem. Bamboo raises the water level in the areas that surround it. It is an enormous consumer of CO<sub>2</sub>, thereby increasing the amount of oxygen in the air. It softens the sounds of the city, and provides a natural barrier of beauty. Although technically a grass, bamboo has the look and feel of the wooden toys that Peter Handstein played with as a child. It's strength and flexibility offer interesting *and ecological* alternatives to Hape's designers.

In 2004 Hape hosted China's first UNESCO bamboo workshop. The unique properties of bamboo inspired new types of designs and twists on traditional toys. Hape's bamboo toys, the industry's first collection of toys based on this natural resource, grew out of the UNESCO event.

Hape has since established its own bamboo workshops, inviting international design students to work with their craftsmen to create new toys using bamboo. A specialized bamboo design facility is located in Zhejiang, adjacent to the company's own bamboo forest.

Vehicles

Made of  
Bamboo! →

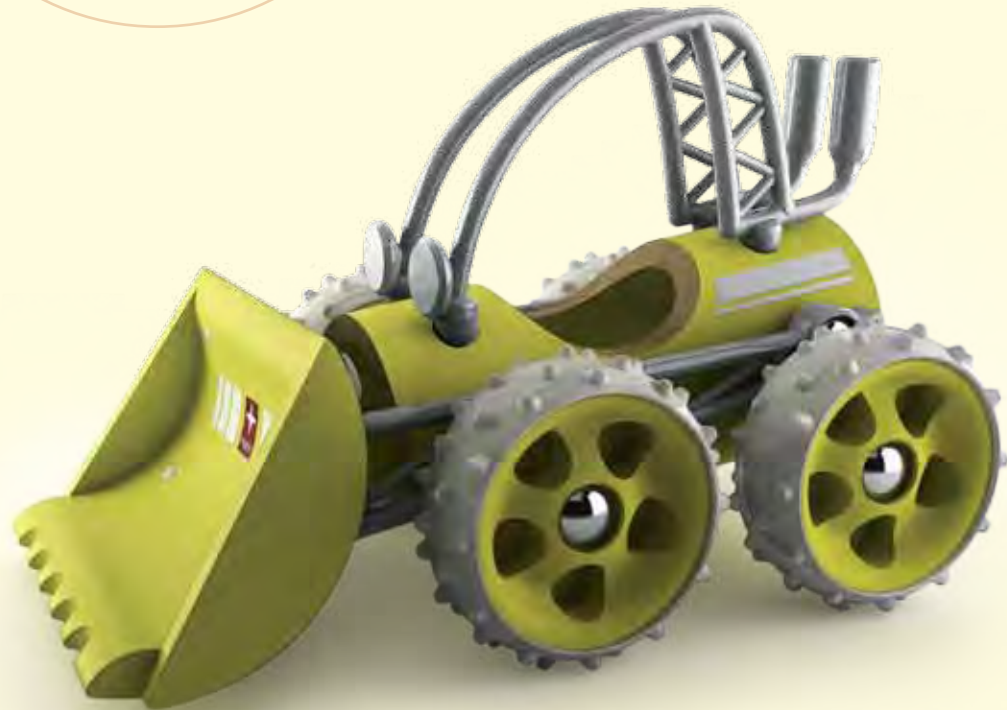

**e-dozer**

897693

Make way! The e-dozer is coming through! This rugged bulldozer is the workhorse of the construction site. Muscle-powered, it pushes and lifts its way over almost anything. Featuring rugged treads and a bamboo body this bulldozer is as environmentally friendly as it is tough!

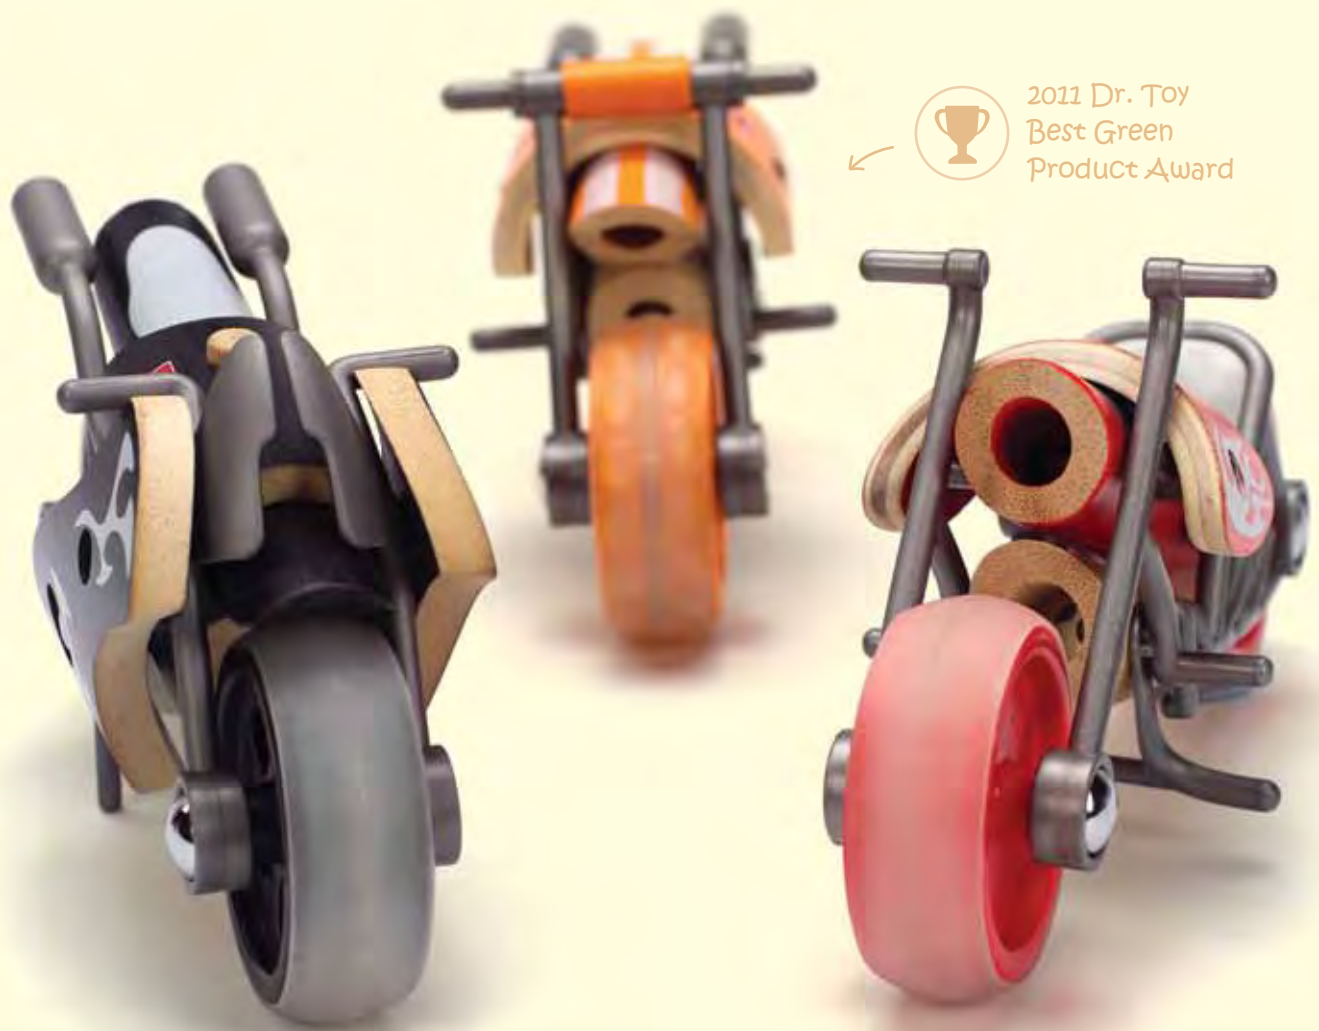

## e-drifter

897682

The e-drifter takes drifting to a whole new level. Made almost entirely of bamboo the e-drifter is the perfect balance of powerful design and environmental friendliness.

2011 Dr. Toy  
Best Green  
Product Award

## e-moto 897659

Hop on and take the e-moto for a spin. The bamboo body is lightweight and durable, making the e-moto perfect for fast rides or big jumps.

## e-chopper 897681

Cruising has never looked so cool. The e-chopper's bamboo body is colored with red water-based paint and flame graphics that will have everyone looking your way.

## e-superbike 897683

The Hape e-superbike is built for two things: speed and style. The beautiful bamboo body and cool graphics are perfect for racers from around the world.

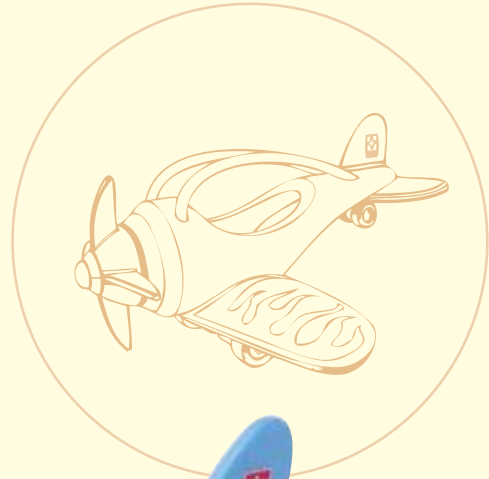

## e-plane

897671

Bold green and blue colors contrast beautifully with the white flame graphics on the wings of this classic airplane. Take a second look and you'll discover this aviation beauty is made of eco-friendly bamboo.

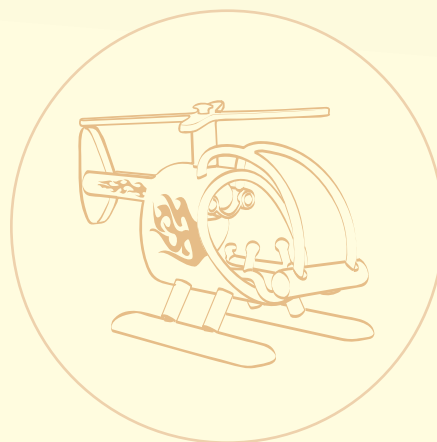

## e-Copter

897656

The e-copter is ready for take off!  
It takes to the skies in style with  
its bamboo body and vibrant  
graphics. Just take hold and let  
your imagination soar.

“Bamboo can fully regenerate within three months.”

# Role Play

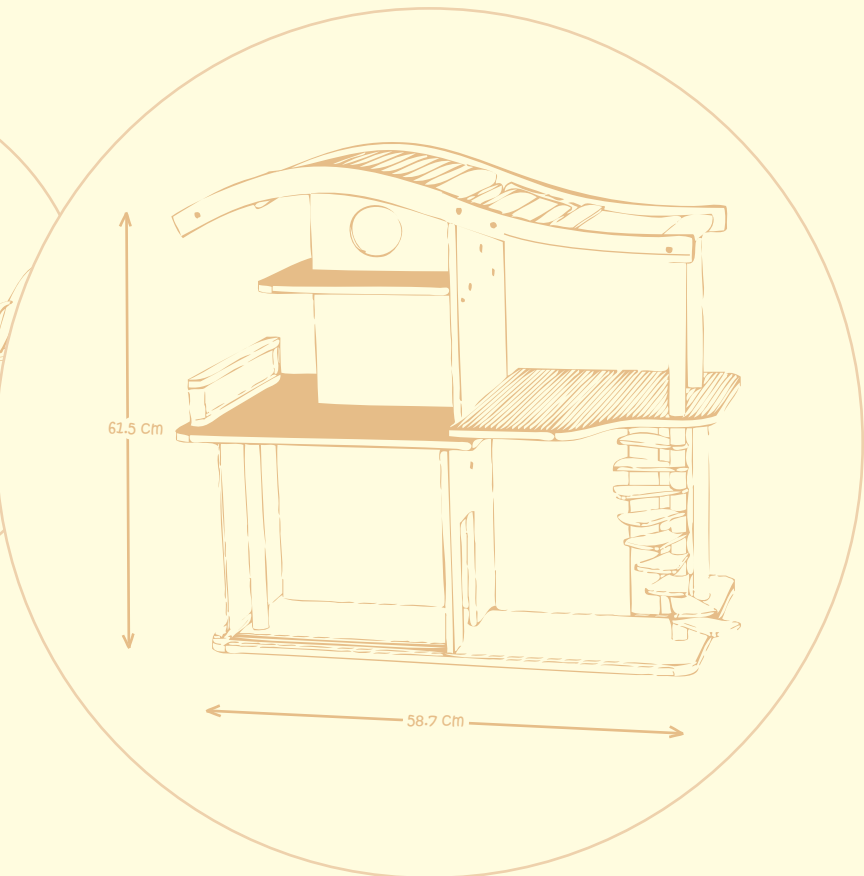

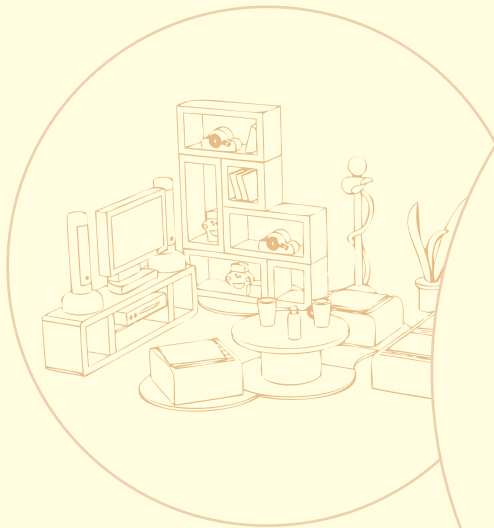

## Hape Bamboo Sunshine Dollhouse 897947

The Hape Bamboo Sunshine Dollhouse is the first dollhouse to offer children eco-friendly materials combined with contemporary designs and modern technology, satisfying both a parent's interest in **green products** and a child's fascination with role play.

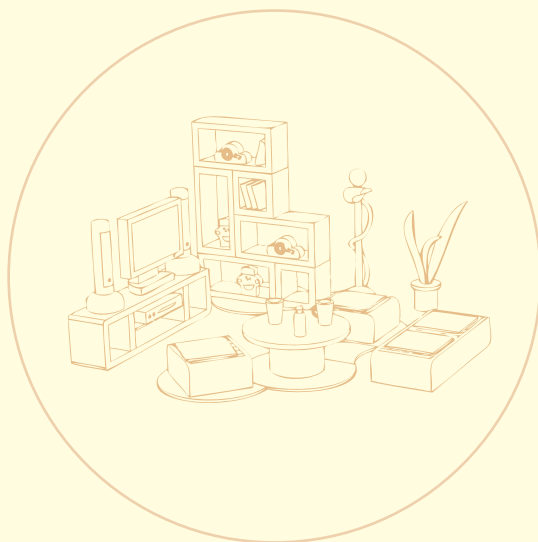

The adjustable, fully-operational

solar panel absorbs light energy which powers five LED lights to brighten three rooms in the house.

Furniture and dolls are sold separately.

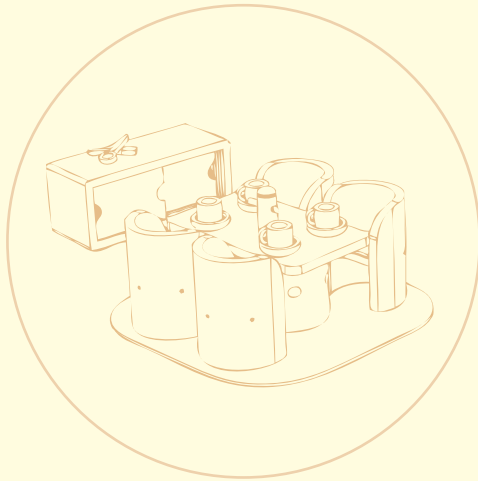

## Hape Lifestyle Living Room 897570

A living room will become the most used room in the dollhouse with a media center that includes a flat panel TV, speakers, shelving, couches and even lighting.

## Hape Cosy Kitchen Diner 89751

This kitchen includes two long work surfaces to prepare meals, a refrigerator that opens and closes and a dinette set to serve four.

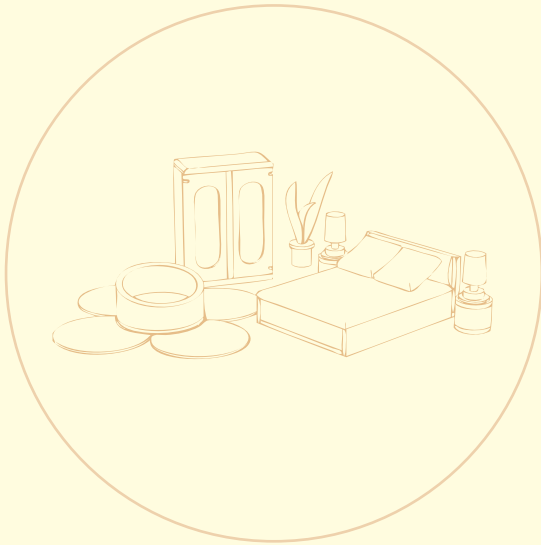

## Hape Trendy Nursery 897565

A rocking horse, bunk beds with colorful bedding, cradle and decorative accessories are nice additions to a child's bedroom in your eco dollhouse.

## Hape Lifestyle Bedroom 897568

Decorate the bedroom in your eco dollhouse with bamboo furnishings including a platform bed, matching closet and nightstands.

## Hape Trendy Bathroom 897569

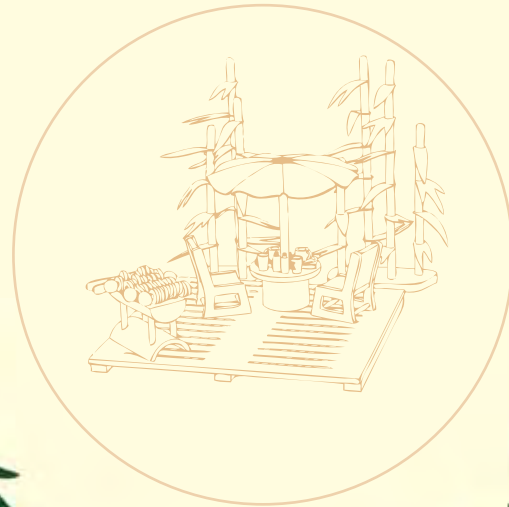

A doll family can get ready for work or soak in the tub in this bathroom with realistic modern fixtures.

## Hape Eco Garden Set 897567

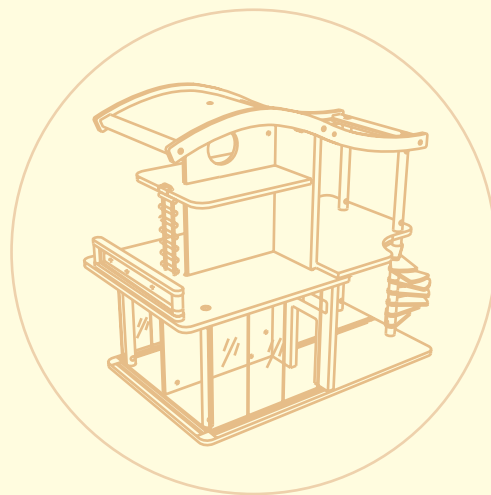

Add an outdoor patio to your dollhouse with bamboo plants, a bamboo deck, patio furniture, and a miniature grill.

## Hape Dolls' Family 897573

This modern family of seven is patiently waiting to move into a new house.

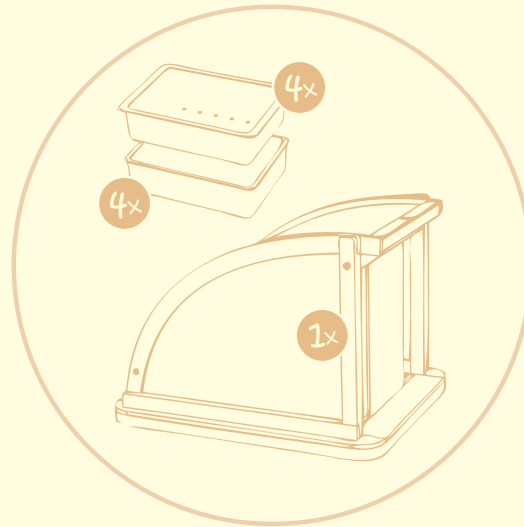

## Hape Eco Greenhouse

897948

There's nothing pretend about this Eco Greenhouse. Budding gardeners can grow real plants. Made of bamboo, the greenhouse opens from the top, has two sliding doors and includes four water trays for growing pretend or real plants.

“Bamboo increases  
the amount of  
oxygen in the air.”
